

Lab - Calculate IPv4 Subnets

Objectives

Part 1: Determine IPv4 Address Subnetting
Part 2: Calculate IPv4 Address Subnetting

Background / Scenario

The ability to work with IPv4 subnets and determine network and host information based on a given IP address and subnet mask is critical to understanding how IPv4 networks operate. The first part is designed to reinforce how to compute network IP address information from a given IP address and subnet mask. When given an IP address and subnet mask, you will be able to determine other information about the subnet.

Instructions

Fill out the tables below with appropriate answers given the IPv4 address, original subnet mask, and new subnet mask.

Problem 1:

Given:	
Host IP Address:	192.168.200.139
Subnet Mask	255.255.255.0

Find:	
Number of Subnet Bits	
Number of Subnets Created	
Number of Host Bits per Subnet	
Number of Hosts per Subnet	
Network Address of this Subnet	
IPv4 Address of First Host on this Subnet	
IPv4 Address of Last Host on this Subnet	
IPv4 Broadcast Address on this Subnet	

Problem 2:

Given:	
Host IP Address:	10.101.99.228
Subnet Mask	255.0.0.0

Find:	
Number of Subnet Bits	
Number of Subnets Created	
Number of Host Bits per Subnet	
Number of Hosts per Subnet	
Network Address of this Subnet	
IPv4 Address of First Host on this Subnet	
IPv4 Address of Last Host on this Subnet	
IPv4 Broadcast Address on this Subnet	

Problem 3:

Given:	
Host IP Address:	172.22.32.12
Subnet Mask	255.255.0.0

Find:	
Number of Subnet Bits	
Number of Subnets Created	
Number of Host Bits per Subnet	
Number of Hosts per Subnet	
Network Address of this Subnet	
IPv4 Address of First Host on this Subnet	
IPv4 Address of Last Host on this Subnet	
IPv4 Broadcast Address on this Subnet	

Problem 4:

Given:	
Host IP Address:	192.168.1.245
Subnet Mask	255.255.255.0

Find:	
Number of Subnet Bits	
Number of Subnets Created	
Number of Host Bits per Subnet	
Number of Hosts per Subnet	
Network Address of this Subnet	
IPv4 Address of First Host on this Subnet	
IPv4 Address of Last Host on this Subnet	
IPv4 Broadcast Address on this Subnet	

Problem 5:

Given:	
Host IP Address:	128.107.0.55
Original Subnet Mask	255.255.255.0

Find:	
Number of Subnet Bits	
Number of Subnets Created	
Number of Host Bits per Subnet	
Number of Hosts per Subnet	
Network Address of this Subnet	
IPv4 Address of First Host on this Subnet	
IPv4 Address of Last Host on this Subnet	
IPv4 Broadcast Address on this Subnet	

Problem 6:

Given:	
Host IP Address:	192.135.250.180
Original Subnet Mask	255.255.0.0

Find:	
Number of Subnet Bits	
Number of Subnets Created	
Number of Host Bits per Subnet	
Number of Hosts per Subnet	
Network Address of this Subnet	
IPv4 Address of First Host on this Subnet	
IPv4 Address of Last Host on this Subnet	
IPv4 Broadcast Address on this Subnet	

Reflection Question

Why is the subnet mask so important when analyzing an IPv4 address?

7. Conversão de binário para decimal: a. 11001101 b. 01000111 c. 01110110 d. 01010101 e. 10101010 8. Conversão de decimal para binário: a. 74 b. 468 c. 752 d. 63 e. 3148 f. 4852 g. 59823 9. Converta os seguintes endereços IP para binário: a. 10.50.60.75 b. 92.63.15.33 c. 192.17.45.189 d. 185.0.165.3 10. Identificação da classe (em que classe se encaixam – A, B ou C) e tipo (privado/público): a. 10.250.1.1 b. 150.10.15.5 c. 192.168.2.50 d. 220.200.23.15 e. 177.100.18.47 f. 172.20.1.2 g. 169.254.3.2 11. Qual dos seguintes endereços IP não é da mesma sub-rede do endereço 191.5.80.80/20? a) 191.5.79.254; b) 191.5.80.50; c) 191.5.83.100;

© 2013 - 2021 Cisco and/or its affiliates. All rights reserved. Cisco Public

d) 191.5.85.200;e) 191.5.95.1;f) 191.5.96.1;

12. Em cada alínea verifique se os endereços IP apresentados estão ou não na mesma sub-rede IP.

a) Endereço IP1: 192.168.1.1

Endereço IP2: 192.168.1.126

Máscara de sub-rede: 255.255.255.128

b) Endereço IP1: 192.168.0.180/27

Endereço IP2: 192.168.0.192/27

c) Endereço IP1: 172.16.100.234

Endereco IP2: 172.16.98.234

Máscara de sub-rede: 255.255.240.0

d) Endereço IP1: 192.168.9.31/27

Endereço IP2: 192.168.9.32/27

e) Endereço IP1: 10.1.0.1/23

Endereço IP2: 10.1.1.1/23

f) Endereço IP1: 10.11.8.100/21

Endereço IP2: 10.11.7.100/21

- 13. Indique quais das seguintes afirmações são verdadeiras:
 - a) 127.0.0.1 é um endereço IP público;
 - b) O endereço 203.127.12.15 é de classe D;
 - c) O endereço 118.15.1.1 é de classe A;
 - d) Um endereço IPv4 é constituído por 32 bits;
 - e) Um endereço IPv4 é constituído por uma parte de host e uma parte de broadcast;
 - f) Endereços IPv4 públicos são, por exemplo, 12.5.8.1/8, 175.16.12.8/16, 196.84.256.118/24;
- 14. Para cada alínea, identifique o endereço de rede, indicando para cada um dos casos o nº de bits relativos à parte de rede e à parte de host:
 - a) 150.203.23.19 255.255.0.0
 - b) 200.120.135.15 -255.255.255.128
 - c) 10.10.10.10/8
 - d) 199.20.150.35/24
 - e) 5.5.5.5/20
 - f) 172.16.29.1/17
- 15. Para cada alínea, indique os seguintes parâmetros:
 - Classe e tipo (privado/publico) de endereço
 - Endereço de rede
 - Endereço de broadcast
 - Número de bits para host

- Numero total de endereços IP por rede
- Número total de hosts por rede
 - a. 223.23.223.109/24
 - b. 10.10.250.1/8
 - c. 192.168.156.3/18
 - d. 172.16.28.150/26
